

## Work Sheet:

Consider these questions to help you figure out where you might like to live.

How much land do I want?

Do I want to be "in the middle of everything" or would I rather some seclusion?

Do I want to be close to my neighbors, or have some space and distance?

Do I want to feel I'm in a city, or do I prefer a suburban feel or even a rural area?

Do I want to live in a condo or town home or is it important to have a yard?

Do I need lots of square footage or am I willing to have a smaller place if its in a "great" location?

(Only you can determine what a "great" location would be. Hopefully answering the above questions will help you figure that out.)
